Paris, Sept. 12. The belief that M. Pierre Laval, Prime Minister of France, intends to spring a surprise when replying to the declaration of British policy, as rendered by Sir ports into Germany. Samuel Hoare before the League Assembly, when he speaks at Geneva to-morrow, is widely current here.

The assertion that France is as eager as Great Britain to uphold the League of Nations is certain form a part of the Prime Minister's statement, but it is believed that he will also announce a new compromise American trade policy, establishoffer to Signor Mussolini, together with an explanation of the result of personal contact he has made with Il Duce over the telephone during the past few days.

Rome, Sept. 12.

Meanwhile, it is reported from, Geneva that a change in Italy's intractable attitude is believed in some quarters to be possible. It is auggested that the Italian spokesman, Baron Aloisi, heretofore deaf to all offers of compromise, may now be prepared to discuss the terms contained in a report now being drawn up by the Council of the Lengue's subcommittee which has been investigating the Italian memorandum respecting Ethiopia's unfitness for membership at Geneva. The report is believed to be based upon suggestions already considered by the Committee of Five.

The report will be submitted to both parties to the Italo-Ethiopian dispute and will constitute the final offer for conciliation which the Committee of Five is prepared to envisage.

It is assumed the report will deal with questions of gendar- paper, Populo di Roma to-day. merie or police in Ethiopia and also the question of territorial concessions to Rome.

Moreover, it is understood that "as from to-morrow the Italian press will cease to attack Great own interests, and make it serve Britain, which may indicate a their home and foreign policies greater willingness on the part of the "high authorities" to listen land and water and monopolies to the suggestions of others in and their incorrigible pride and the matter of this present crisis. jealousy. -Reuter.

New York, Sept. 12.

Miss Evelyn Hoey, noted Breadway musical comedy star, was found shot dead through the right temple in the bedroom of the home of Mr. Henry Huddleston Rogers, Jr., son of the late Oil King, at Westchester, - Ponnsylvania, today. Rogers and a friend named William J. Kelley have been nrrested by the police and are being held for questioning.

Francis Grubb, County detective, said a party preceded Miss Hoey's death, which was apparently a case of suicide. He said Rogers was drunk and incoherent when arrested. Miss Hoey was the only woman guest in the home at the time of the tragedy.

A week ago, said the detective, Miss Hoey threatened to depart, but Rogers destroyed the telephone. "A chauffeur, named Frank Catalano, and Miss Hoey tried to borrow a train fare, whereupon Rogers ordered the chauffeur to drive her to New York. He then went to the bedroom, and later

Catalano heard a shot." Another guest, Claude Battin, said Rogers was with them when they heard the shot upstairs .-

Geneva, Sept. 12.

"Whatever may happen in the end, nobody shall say that the British Government and its representatives have not made every possible effort to avoid what we believe would be a great calamity," declared Sir Samuel Hoare, the British Foreign Minister, in a broadcast speech to-night, in which he described most vividly his impressions of the developments in the international sphere during the past few days.

Sir Samuel said he had been deeply struck by the respect in which his country, and indeed the whole of the Empire, was held by the world. He felt over and over again the immense weight of responsibility as a representative of a Government to which so many countries seemed to be looking for guidance and advice.

"I tried to put to them a typical British viewpoint," said Sir Samuel, "and in particular to express to them, first, our universal desire to live and let live in peace, and second, to keep our word solemnly given in the Covenant of the League of Nations."

## Frenchmen Prefer Their Socks

WHEN IT COMES TO PUTTING AWAY FOR A RAINY DAY

Paris, Aug. 30. THAT famous woollen sock of the French peasant, which, if the truth must come out, is also the favourite banking place of many a member of the bourgeoise, is now stuffed to bursting with 27,000,000,000 francs.

Distrusting banks, preferring to keep money in the form of bank notes or sounding coins rather than in the complicated form of stocks or bonds which may be untrustworthy, or sinking it into businesses or property which may not be easy to liquidate and which, besides, the tax collector can't miss secing, your old-fashioned Frenchman had hoarded his cash to the extent of 30,000,000,000 francs, approximately one-third of the amount of money in circulation, before the Laval government restored confidence to the less timid, who let 3,000,000,000 francs get back

into activity. The thousand franc note tends to disappear quickest into the woollen sock. That denomination alone accounts for 7,000,000,000 francs of the total amount. Silver coins are next in favour among the hoarders, for though they are worth less outside of the country than the paper money and are easier to counterfeit, they look more substantial to the eye of a country which, outside of the biggest cities, still regards government paper as a subterfuge for offering ringing coin and calls for the police if you reach for a chequebook.—United Press.

## Wife In U.S. Asks the King for Aid

HUSBAND CHOOSES HIS MOTHER

New York, Sept. 3. A young London woman. Mrs. Viola Adel, now the wife of a doctor in New York, has appealed to the British Crown for aid "one friendless and penniless in a strange country."

Mrs. Adel, a tall, striking brunette, seeks help to combat annulment proceedings by her husband, Dr. Milton T. Adel.

Her petition was addressed to the King through Sir Gerald Campbell, British Consul-General here.

The pair met while Dr. Adel was studying medicine at St. Bartholomew's Hospital London. They were married in London in 1932 when the doctor had completed his studies.

He brought his wife to the United States, and shortly after their arrival, she says, he informed her that he must choose between his love for his mother and his love for her.

Mrs. 'Adel has filed a suit for separation, and asserts that her husband left her penniless.

## Foreign Bid For British Ray Secret

INVENTOR WAITS FOR GOVERNMENT TO DECIDE

AN INVENTOR, proud of his British parentage, sits in his St. James's-street flat guarding an invention of great importance in air warfare and wondering if he will have to accept an offer he has had from a foreign government for the purchase

of the apparatus.

The inventor is Commander Paul H. Macneil.

His invention is a detector which by means of an infra-red ray can detect enemy aircraft and fix the position of aircraft at any height through fog, smoke screens, or the darkness of night.

He claims that anti-aircraft guns can be fitted with the apparatus and synchronised so that when an enemy airplane crosses the infra-red beam the gun automatically fires.

He explained how a ring of the anti-aircraft detectors could be placed around London.

#### Test In A Tent

The War Office and the Air Ministry have been in communication with him since last September, but have not yet made a decision. Commander Macnell has not heard a word, from them for a fortnight.

"At the request of the War Office," he said, "I went down in February to Biggin Hill for a test. They put me in an Army tent in a field, and asked me to detect hidden objects through hedges and fences at ranges from 1,000 to 2,300 yards. I did so. I found later that the hidden objects were plumbers' blow-lamps in action.

"They asked me to detect airplanes through the tent roof at various heights and distance. did so. I even detected the presence of a man who, unknown to me, was approaching the tent across the field.

"Sinco then I have written scores of letters in answer to both the War Office and the Air

Ministry. "To-day I am still not able to leave this delicate apparatus for a

moment."

"The offer from the foreign Government came yesterday Officials from its embassy visited me and asked me to prepare a draft of the terms of my offer of

I have no animosity against the Government departments.' I simply want the matter settled as soon as possible. I made them a financial proposal two months ago. "If things go on as they are much longer I shall have to entertain the offer of the foreign

£10 for "Mental-Anguish" of Cow That Lost Tail

Pitsfield (Mass.), Sept. 1. The "mental anguish" of a cow who lost her tail has been the means of enriching her master by £10.

A farmer here proved to the satisfaction of a magistrate that his best cow, since her tail had been bitten off up to the stump by a neighbour's dogs, had been unable to switch away the flies that awarmed round her and had been so upset that her yield of milk had suffered.

So the farmer, Mr. Clarence North, of Richmond, was awarded £10 in compensation.—Reuter.

The fight against the leebergs in the Arctic Sea has became more sharp since the British have begun to use the explosive thermit, which develops a heat of 2,000 degrees and melts the icebergs. Hitherto the destruction of icebergs has been undertaken as shown in the picture above by gunfire from an international ice patrol ship.

Time: Monday morning. Scene: Any office. Characters: Any two workers. "Have a good week-end?. You look sunburned,"

"Fine. But I feel awful." TX/HY is it? We spend the week-end

in the sun, take plenty of exercise, try to build ourselves up for another week's work. On Monday morning we feel fit for nothing.

Recent sunny week-ends have reaped an extra corp of "Monday morning" victims. With muzzy head and aching limbs, I reached for the telephone yesterday and asked for a doctor's

number. Medicus, young and sympathetic, answered.

'Blame the fine weather," said he voice.

"The unusual run of fine week-ends has made the public grab their good fortune with both hands. They overdo their

week-end exercise. "Public amusement is so highly organised nowadays that it is easy for you to put more strain on your system than it can stand.

"The trouble is, few people know how to relax.

High Speed Life "Modern high-speed life tends to make you nervous and highly strung. During week-ends you go all out to work off your

"By Sunday evening you have probably succeeded, and feeling tired but happy.

"On Monday morning comes the reaction. The prospect of work after so much play makes you feel all the worse.

"Exercise is a grand thing, but for many people less exercise and more rest is better.

"A final tip. While the warm weather lasts, hiking may be harmful; swimming is best."

#### MANY CHINESE NEWSPAPERS

#### But Few Of Them Attain Old Age

AN average of 23 vernacular newspapers cater for Hongkong's Chinese population of over 900,000, according to statistics compiled by the Secretariat for Chinese Affairs.

Few Chinese newspapers published in Hongkong, however, attain longevity.

Of the 23 Chinese newspapers, just over fifteen were in existence previous to 1934. During the year five new journals made their appearance. Probably as many dis-

appeared. Last year 31 books, the majority printed in Chinese, were registered in Hongkong.

## Five Pound Note No. 1 For Treasury

ISSUED IN 1793: BEQUEATHED IN £120,000 WILL

FIVE POUND NOTE NUM-BER ONE is to return to the Bank of England, which issued it in 1793.

It is bequeathed to the Bank in the will of Mr. Charles Daniel Higham, F.I.A., of Avenue-road, Regent's Park, N.W., actuary, who died on July 1 last, aged 86 years, and who left £124,021 gross, with net personalty £110,-996.

The will states that he leaves to the Governor and Company of the Bank of England "In grateful remembrance of many kindly courtesies during 20 years of pleasant association as Actuary of the Bank Provident Society," his five pound note numbered 1, and dated 15/4/1793, and the printed statement which the Bank issued on February 27, 1797, informing the proprietors and the public of its most affluent and prosperous situation such as to preclude every doubt as to the security of its notes.

After a number of legacies he leaves the residue of the property to his wife for life, and then a number of annuities, including one in his service at his death.

## Jilted By King So Father Led Albanian Revolt-

SEVEN-YEAR-OLD GRIEVANCE

TATHEN King Zog of Albania reached the throne seven years ago he jilted the girl to whom he was engaged. Said a monarch could not marry a commoner.

Belgrade, Sept. 1. Her father was enraged—harboured a deep grievance.

Now comes news of another widespread revoltled by the father, Shevket Beg Verlatzi, a southern Albanian landowner and a leader of the Nationalists.

First messages which reached the outside world from Europe's tiniest kingdom stated that the assassin's bullet which killed King Zog's adjutant, General Ghilardi, was the signal for the southern province of Berat to revolt against the king.

The assassin is said to have confessed that he intended to kill the King. He did not know that it was General Ghilardi who was riding in the King's

Police advanced on Fieri, the capital of Bernt, but were repulsed.

The army followed the police, and, according to an official report Albanian sources in Beigrade, succeeded in wresting Fieri from the rebels and restored order in the town.

At least fifty of the rebels were killed and abut a dozen men on the Government side. To-night the Albanian news husband, Low Ayres, returns to agency stated that "the situation is in hand."

## HONGKONG BUDGET

## GOVERNMENT CUTS AND MORE TAXATION

#### ALREADY SANCTIONED IN CASE OF FURTHER DEFICIT

Introducing the Budget in the Legislative Council yesterday, the Hon. Mr. Smith stated that the position had not improved during the past twelve months and there were few, if any, signs of recovery for the future. Despite revised reduced estimates for next year, a revenue deficit of one and a half million dollars was anticipated.

Although the 1935 scale of taxes was unaltered, save for a reduction in the hardship of excess water charges, with its consequent loss of half a million dollars to revenue, it was well, he said, that a note of warning should be given now, that increased taxatlon and a temporary levy on all Government salaries might be necessary if the state of the public finances in 1936 should show serious deterioration. The Secretary of State had already given his sanction to action on these lines.

A balanced Budget would be achieved, however, if the dollar rate averaged about 1/101/2d during 1936. The Government had authority from the Secretary of State to use half a million dollars from the 1925 Trade Loan fund, but it proposed leaving this for a real "rainy day."

Economy in all departments of the Government, staff retrenchments and a policy of abolishing vacancles when they arose and made no serious defect in the efficiency of the work concerned, would be pursued in effecting very considerable curtailments of Government expenditure.

The figures which I have just given show that it was expected that it would be necessary to draw on our surplus balances to the extent of \$1,970,452 during the present year, and that we have revised that figure to \$152,966, which will leave us with a surplus balance at the end of this year of \$12,095,789. As Hon. Members are aware it is the policy of this Government so to frame its annual sages, purchases from Crown Agents, State. #### Government Expenses

On this understanding the Budgetary problem resolves itself largely into a question of curtailing the expenses of Government. The first curtailment to be considered is that of Public Works Extraordinary as being the largest single Head Expenditure apart from Military Contribution. #### Prisons Department

As regards the wireless side of The continued growth in the prison population of the Colony is reflected in the not increase in "Other Charges" under this Head. Sufficient has I think been said on this subject on more than one previous occasion, so that there is no need for me to go into it again to-day. It is not a satisfactory position, but this Colony must carry out its international obligations as regards oplum, Another aspect of this policy is shown in the very much reduced revenue which we expect to get from sales of Government oplum next year. There is no change in the establishment of prisons staff.

#### Snails for Sport

Mr. Kelly, after three days of meandering around the Colony with a bevy of Australian beauties, has had his sport-

ing instincts aroused. His sporting instincts in one direction defeated by the vigilance of four chaperones, Mr. Kelly has decided to take up racing as a career.

Owing to the high cost of ponies, he has decided to take up a racing career commensurate with the state of his finances. He states how, when, why, where and who below:

Snail racing for sport!

Let us revive and put this fine old sport on a proper footing. Dirty tacties, like putting lime

on the track just near the home turn, and ringing-in periwinkles. or those pine-tree grubs which annoy the Forestry Department so, should not be tolerated..

A glaring instance of roguery will be remembered by old-time Hongkong sportsmen when the old Kowloon-Canton Snailway was in existence.

In a handicap évent, Slobber, a very poor performer, who had been brought down from viceladen Shanghai, was the medium of some heavy betting, and romped home in-front of a classy field.

The stewards found at the inquiry that Slobber's shell had been shaved down, and the owner, trainer and snail were disqualified for life.

He was never any good after this supreme effort.

The most famous of all snails was Greasy, who humped his shell, and half an ounce of chewing gum, over a fifty-yard course and finished in the remarkable time of 2 days 21 hours dead.

A badly trained snail will always play up at the barrier and, keeping this in mind, it would be well for owners to have their snails trained from the time they are sluggered

The destined executioners represented by Cutmore and O'Connor mingled with their victims on the way to the crease and the axe fell a few minutes later.

#### VERDICT OF THE SKIPPER

. After the match, when I spoke . to Herbert Wade in the dressing room, the skipper paid a warm tribute to the success of Essex. Ho said:

We have had so far a long and exhausting tour; but that has nothing at all to do with to-day's result. It was a jolly good victory and we all congratulate the county side on a splendid performance."

Taking a general view of this match one is tempted to write down the latest performance of Essex as one of the best in their career, although as far as the present season is concerned the great victory over Yorkshire must take

#### A. VITAL PARTNERSHIP

It was undoubtedly Nichols and Cutmore who tolled the bell for ithe South Africans. This pair came together when the total stood jat 33 for 2 wickets, and during a period of, 70 minutes another 100 runs were added.

By square and late cuts, off drives and leg hits Nichols, who the Hurricanes while Gerry netted was always very much at home three and Strawbridge one. ## DELIBERATELY BREAKS UP HEAD

UNDER MISTAKEN IMPRESSION THAT THE JACK WAS BURNED

An amazing incident, one that should never occur in competitive lawn bowls marred the semi-final match in the open Singles Championship of the Colony on the Kowloon Cricket Club green yesterday afternoon when R. Duncan, the Kowloon Bowling Green Club player, qualified for his third final of the season by beating G. N. Mitchell, of the Kowloon Dock R. C., by 21 shots to 19 in a match that was of quife a high standard of bowls, and there were many interesting, heads on which both players sent down some brilliant woods.

It was an unfortunate incident from the point of view that Duncan, who was then leading by eight shots to two and was out-playing his opponent, was so completely upset that he all but lost the match. This apparently would have given Duncan the option of replacing all of his own woods where he thought they had been and allowed Mitchell's woods to remain where they had been thrown after having been burned. In other words I am firmly of the opinion that Duncan was fully entitled to claim

However, Duncan was reluctant that any unpleasantness should enter the game and agreed to replay the head, a sporting gesture which nearly cost him the match.

Paris, Sept. 12. The belief that M. Pierre Laval, Prime Minister of France, intends to spring a surprise when replying to the declaration of British policy, as rendered by Sir Samuel Hoare before the League Assembly, when he speaks at Geneva to-morrow, is widely current here.

The assertion that France is as eager as Great Britain to uphold the League of Nations is certain to form a part of the Prime Minister's statement, but it is believed that he will also announce a new compromise offer to Signor Mussolini, together with an explanation of the result of personal contact he has made with Il neling Colonial Secretary in the Duce over the telephone during the past few days.

Meanwhile, it is reported from Geneva that a change in Italy's intractable attitude is believed in some quarters to be possible. It is suggested that the Italian spokesman, Baron Aloisi, heretofore deaf to all offers of compromise, may now be prepared to discuss the terms contained in a report now being drawn up by the Council of the Longue's subcommittee which has been investigating the Italian memorandum respecting Ethiopia's unfitness for membership at Geneva. Geneva, Sept. 12.

"Whatever may happen in the end, nobody shall say that the British Government and its representatives have not made every possible effort to avoid what we believe would be a great calamity," declared Sir Samuel Hoare, the British Foreign Minister, in a broadcast speech to-night, in which he described most vividly his impressions of the developments in the international sphere during the past few days.

Sir Samuel said he had been deeply struck by the respect in which his country, and indeed the whole of the Empire, was held by the world. He felt over and over again the immense weight of responsibility as a representative of a Government to which so many countries seemed to be looking for guidance and advice.

"I tried to put to them a typical British viewpoint," said Sir Samuel, "and in particular to express to them, first, our universal desire to live and let live in peace, and second, to keep our word solemnly given in the Covenant of the League of Nations."

## Frenchmen Prefer Their Socks

WHEN IT COMES TO PUTTING AWAY FOR A RAINY DAY

Paris, Aug. 30.

THAT famous woollen sock of the French peasant, which, if the truth must come out, is also the favourite banking place of many a member of the bourgeoise, is now stuffed to bursting with 27,000,000,000

Distrusting banks, preferring to keep money in the form of bank notes or sounding coins rather than in the complicated form of stocks or bonds which may be untrustworthy, or sinking it into businesses or property which may not be easy to liquidate and which, besides, the tax collector can't miss seeing, your old-fashioned Frenchman had hoarded his cash to the extent of 30,000,000,000 francs, approximately one-third of the amount of money in circulation, before the Laval government restored confidence to the less timid, who let 3,000,000,000 france get back into activity.

The thousand franc note tends to disappear quickest into the woollen sock. That denomination alone accounts for 7,000,000,000 france of the total amount, Silver coins are next in favour among the hoarders, for though they are worth less outside of the country than the paper money and are easier to counterfeit, they look more substantial to the eye of a country which, outside of the biggest cities, still regards government paper as a subterfuge for offering ringing coin and calls for the police if you reach for a chequebook.—United Press.

## By Wife Who Refuses Second Divorce

Vienna, Sept. 3. ME. Chariotte Tauber Vanconti, the woman who stands between Richard. Tauber and marriage in Austria to his fiancee, Diana Napier, the British film star, to-day sued Tauber in the Vienna courts for nonpayment of alimony.

She and Richard Tauber were divorced in Berlin in 1928. Although a separation took place in 1931 in Austria, where they were married, the divorce has Ethiopia's not been confirmed, so that Richard Tauber cannot marry Diana Napier in Austria.

At the time of the Berlin divorce, Richard Tauber made over to Mme. Vanconti a villa worth £15,000 and a sum of £13,000.

Later he gave her a monthly allowance of £100;

A short time ago, stated Dr. Emanuel Hift, Mme. Vanconti's lawyer, M. Tauber became engaged to Miss Dlana Napier. In order to marry her, he asked

Mme. Vancopti to agree to a second divorce in Vienna. Mme. Vanconti refused. Mme. Vanconti now claims the

arrears of the allowance which Richard Tauber stopped paying. The case was adjourned.

HUSBAND CHOOSES HIS MOTHER

New York, Sept. 3. A young London woman, Mrs. Viola Adel, now the wife of a doctor in New York, has appealed to the British Crown for aid as "one friendless and penniless in a strange country."

Mrs. Adel, a tall, striking brunette, seeks help to combat, annulment proceedings by her husband, Dr. Milton T. Adel.

Her petition was addressed to the King through Sir Gerald British Campbell, General here.

The pair met while Dr. Adel British Stores was studying medicine at St. Bartholomew's Hospital London. They were married in London in 1932 when the doctor had completed his studies.

He brought his wife to the United States, and shortly after their arrival, she says, he informed her that he must choose between his love for his mother and his love for her.

Mrs. Adel has filed a suit for separation, and asserts that her husband left her penniless.

#### lewish Faith

She adds that when she came to America she embraced the Jewish faith at the instance of her motherin-law.

The husband, in his annulment suit, alleges that his wife concealed the fact that she had a child by a former marriage in London.

She asserts that the doctor knew of the existence of her seven-yearold son Desmond Gould, and even bought the boy presents.

But at the moment she is making a bid to become the world's first fighting airwoman.

Far away in New York the negroes have heard the sound of the war drums in Abyssinia, and a negro air squadron is in training at Roosevelt Field, Long Island, to go to fight for Abyssinia.

Miss Inckson is training with "I am the only coloured airwoman in the United States,'

she said. "I want to form a women's flying corps to serve as nurses, but I'll serve in the front line if they want me. It was when Miss Jackson was

#### Lose A Fortune-Shoplifters

London, Sept. 3. A bench of London magistrates were amazed the other day when the manager of a bazaar told them that losses by theft from such stores were sometimes as much as

£50 a day. But they would be more astonished if they knew that the big stores of Britain write off \$500,000 every year to cover the cost of goods taken by shoplifters.

"We increase our staff to watch these people," the manager of a big West End establishment said, "but our hands are tied against most of the offenders. When we see some fashionable kleptomaniac take goods right before our eyes, we must hesitate. We are more scared of her being arrested than she is. Suppose we don't find the goods on her . .

"The resultant damages are usually very heavy, and the effect of the publicity on our reputation is greater than anyone could imagine."

INVENTOR WAITS FOR GOVERNMENT-TO DECIDE

N INVENTOR, proud of his British parentage, sits in his St. James's-street flat guarding an invention of great importance in air warfare and wondering if he will have to accept an offer he has had from a foreign government for the purchase of the apparatus.

The inventor is Commander Paul H. Macneil.

His invention is a detector which by means of an infra-red ray can detect enemy aircraft and fix the position of aircraft at any height through fog, smoke screens, or the darkness of night.

He claims that anti-aircraft guns can be fitted with the apparatus and synchronised so that when an enemy airplane crosses the infra-red beam the gun automatically fires.

He explained how a ring of the anti-aircraft detectors could be placed around London.

#### Test In A Tent

The War Office and the Air Ministry have been in communication with him since last September, but have not yet made a decision. Commander Macneil has not heard a word from them for a fortnight.

"At the request of the War Office," he said, "I went down in February to Biggin Hill for a test. They put me in an Army tent in a field, and asked me to detect hidden objects through hedges and fences at ranges from 1,000 to 2,300 yards. I did so. I found later that the hidden objects were plumbers' blow-lamps in action.

"They asked me to detect airplanes through the tent roof at various heights and distance. did se. I even detected the presence of a man who, unknown to me, was approaching the tent across the field.

I have no animosity against the Government departments. I simply want the matter settled as soon as possible. I made them a

Commander Macneil was born in Chicago of British parents who never became American citizens. He entered Britain with an Amercan passport.

Recent sunny week-ends have reaped an extra corp of 'Monday morning'' victims.

With muzzy head and aching limbs, I reached for the telephone yesterday and asked for a doctor's number.

Medicus, young and sympathetic, answered.

"Blame the fine weather," said the voice.

"The unusual run of fine week-ends has made the public grab their good fortune with both hands. They overdo their

week-end exercise. "Public amusement is so highly organised nowadays that it is easy for you to put more strain on your system than it can stand.

"The trouble is, few people know how to relax. High Speed Life

"Modern high-speed life tends to make you nervous and highly strung. During week-ends you go all out to work off your chergy.

"By Sunday evening you have probably succeeded, and feeling tired but happy.

"On Monday morning comes the reaction. The prospect of work after so much play makes you feel all the worse. "Exercise is a grand thing,

but for many people less exercise and more rest is better. "A final tip. While the warm

weather lasts, hiking may be harmful; swimming is best."

led by the father, Shevket Beg Verlatzi, a southern

Albanian landowner and a leader of the Nationalists. First messages which reached the outside world from Europe's tiniest kingdom stated that the assassin's bullet which killed King Zog's adjutant, General Ghilardi, was the signal for the

revolt against the king. The assassin is said to have confessed that he intended to kill the King. He did not know that it was General Ghilardi who was riding in the King's

southern province of Berat to

Police advanced on Fleri, the capital of Berat, but were

repulsed. The army followed the police, and, according to an official report Albanian sources in Belgrade, succeeded in wresting Fieri from the rebels and restored order in the town.

At least fifty of the rebels were killed and abut a dozen men on the Government side. To-night the Albanian news agency stated that "the situation is. in hand."

# HONGKONG BUDGET

## GOVERNMENT CUTS AND MORE TAXATION

#### ALREADY SANCTIONED IN CASE OF FURTHER DEFICIT

Introducing the Budget in the Legislative Council yesterday, the Hon, Mr. Smith stated that the position had not improved during the past twelve months and there were few, if any, signs of recovery for the future. Despite revised reduced estimates for next year, a revenue deficit of one and a half million dollars was anticipated.

Although the 1935 scale of taxes was unaltered, save for a reduction in the hardship of excess water charges, with its consequent loss of half a million dollars to revenue, it was well, he said, that a note of warning should be given now, that increased taxation and a temporary levy on all Government salaries might be necessary if the state of the public finances in 1936 should show serious deterioration. The Secretary of State had already given his sanction to action on these lines.

#### ACCOUNTING METHODS CRITICISED

ANNUAL REPORT BY THE COLONY AUDITOR

Criticism of certain accounting methods in Government departments is contained in the annual report, just issued, of Mr. P. L. Collisson, the Auditor. He states:

Subject to the comments contained in this report the accounts generally have been satisfactorily kept and rendered and the existing regulations appear to provide reasonable accounting protection against irregularities and traud.

The main item in the figures lead-ing to the liability "Suspense Ac-count" is still \$975,413.78 on account of "Military Contribution" referred to in many previous reports, but as the Estimates for 1935 provide for this as a Miscellaneous Receipt pre-sumably the amount will during the current year be transferred to Revenue and the discussion of many years will in this particular respect come to a ratifactory conclusion.

Treasurer's Cash Balance

The constitution of the Cash Balance in the hands of the Treasurer at the end of the year, has been referred to in the Annual Report for 1930 and each subrequent year. This vexed question has at last been settled by the Secretary of State in despatch No. 99 of 12th March 1935 supporting the original sudit contention and ruling that he is unable to authorize any relaxation of the important rule that payments can only be charged at the date on which they are actually made. Two methods for future procedure were suggested by the Secretary of State but the decision of the Government giving effect to his ruling has not yet been communicated, The attention of Government was Although the engine was not fully

Arrangements have now been made for future boards to be held in conformity with regulation. During the audit of the Supreme hoped that the engine will save Court accounts attention was drawn to the large sums which had been on deposit over 5 years for which no liability was, likely to arise, and in accordance with Colonial Regulation costs of engine and track .-330 arrangements have been made to British Wireless.

transfer over \$25,000 to Revenire Secretariat for Chinese Affairs Reference has been made in previous reports to the Secretarial for Chinese Affairs accounts which owing to their special nature are "outside the accounts of the Colony except in so far as the Treasury acts as banker." It happens, however, that this particular department collects a small amount of purely Government revenue and incurs Government expenditure on Personal Empluments &c., the transactions for which are merged in the main accounts of the office.

Thus in the 2nd Quarter of 1934 the revenue collected was \$340 out of total receipts amounting to \$69,600. To audit this very small portion it becomes necessary to examine to a certain extent the books of the Secretariat for Chinese Affairs without actually being responsible for their entire audit.

This is unsatisfactory and it would undoubtedly be of advantage and more correct if the accounts for the actual. Government revenue and expenditure were kept completely separate and in different books from the remaining accounts of the Secretariat for Chinese Affairs. The suggestion in audit that this should be

done was not accepted, . The annual local examination of the Registrar of Companies Accounts at Shanghai was made in September and the accounts audited to date. The revenue from this source during the year was \$177,867, as compared with #141,342 for the previous year.

Counterful Receipts Consequent on your Circular Revestigation was made early in the year into the control of this important method of accounting for the collection of revenue.

With one exception the departwere revealed between the Central Register kept in the Treasury and that kept in the department.

A shortage of \$357.86 in the Post Office cash and stamps of an absconding clerk was made good in part by the estreatment of his security and forfeiture of salary while the balance was written off with the approval of the Secretary of State.

Loan Accounting An important feature of the year's accounts has been the redemption of the Inscribed Stock Lonns of 1893 and tions. 1906 amounting to £1,485,733 and the flotation locally of the 31/2% Dollar Lonn. The actual redemption of the

Sterling Lonns was carried out by the Crown Agents and their figures have been accepted. There have been so many departures from the authorised accounting pro-

at some length. During the year bonds to the department an amended statement amount of \$14,000,000 were issued by was published in the Gazetto of Au-Government under the Ordinance gust 2 1935.

# The Very Idea,

RAMBLING THOUGHTS

Kelly's Mind Is Still All A Flutter

REING a somewhat fanciful man, Edward Kelly, the wellknown pincher of other people's correspondence, has conceived the entirely fanciful idea of writing about a Mother's letter to a Young Australia League girl, after receiving the Yallers letter about her reception in Hongkong. It would, according to Mr.

Kelly, go something like this: My darling daughter,-I am terrified at the hostile reception you received in Hongkong and want you to pack up and return

right away to civilised Australia. Long ago, before you were about those dreadful secret lharaunged the crowd.

It was awfully brave of the The projector was put on the greatly simplified would be the task Society to rescue you from the of h mixed and merciful jury. Rotary Society but, darling, I have always made you lead a sheltered life down here, and 1 am not sure that you weren't

It must have been a terrible experience to have had to eat Chinese chow four times while you were in Hongkong. I never thought, when you started off, that my darilng daughter would be forced into cannibalism.

Hongkong must be infested with terrible marauders. You didn't tell me, however, dear, what that terrible Ginsling did to you after he knocked you

I am glad there is at least one brave Australian in Hongkong-

#### Snails for Sport

Mr. Kelly, after three days of meandering around the Colony with a bovy of Australian beauties, has had his sporting instincts aroused.

His sporting instincts in one direction defeated by the vigilance of four chaperones, Mr. Kelly has decided to take up racing as a career. Owing to the high cost of

ponies, he has decided to take up a racing career commensurate with the state of his finances. He states how, when, why, where and who below:

Snail racing for sport!

Let us revive and put this fine old sport on a proper footing.

Dirty tactics, like putting lime But when the new era dawns, a on the track just near the home turn, and ringing-in periwinkles annoy the Forestry Department so, should not be tolerated.

A glaring instance of roguery will be remembered by old-time Hongkong sportsmen when the old Kowloon-Canton Snailway was in existence.

In a handicap event, Slobber, a very poor performer, who had been brought down from viceladen Shanghai, was the medium of some heavy betting, and romped home in front of a classy field. The stewards found at the

inquiry that Slobber's shell had been shaved down, and the owner, trainer and snail were '. disqualified for life.

He was never any good after this supreme effort.

The most famous of all snails was Greasy, who humped his shell, and half an ounce of chewing gum, over a fifty-yard course and finished in the remarkable time of 2 days 21 hours dead.

A badly trained snail will always play up at the barrier and, keeping this in mind, it would be well for owners to have their snails trained from the time they are slugs.

#### **Body Line**

After viewing 34 feminine figures at a swimming picnic the other night, Edward Kelly is convinced that the steamer on which the Young Australia League gals travelled from Australia must have been one of those Body Line vessels he heard so much about last year.

#### DISCRIMINATION DENIED

GERMAN OFFICIAL IN AMERICA

New York, Sept. 8. Charges of racial discrimination by Germany in selection of athletes for the 1936 Olympics were said to be groundless by Berlin games.

Schmitz has been travelling around the United States and has obtained much valuable data on the past Olympic games held in Los Angeles in 1932, as well as material on plans formulated in this country for the coming international competition. "As far as I know there has been

no discrimination against Jewish athletes on the part of German olympic officials." Schmitz said. "At the present time Jewish men and women have instructors supplied by the state to train them for the forthcoming Olympics.'

Germany intends to keep politics out of athletics throughout the prethe games themselves, Schmitz has

found the majority of American athletes and officials are of the same opinion and are planning to go

through with the programme in Berlin next year. Questioned on the statements made by American officials who desire to withdraw their team from

the Olympics if they are held it Germany, benmitz replied: PROMOTING WORLD PEACE

"The statement made by Judge Mahoney, Amateur Athletic Union president, does not particularly alarm me. I have covered nearly ten thousand miles while in this country, and I found that most sportsmen are of the opinion that the United States should enery out the Olympics in Berlin in 1930."

games will do much in bringing machinery of a Test eleven and its Ernst Schmitz, member of the about a better feeling among the concommitant details, and to note the organizing committee for the younger generation by their asso- variations in particular points—such Zealand were the order of day, and ciation with the youth of different as the remuneration of the players the players got £20, and the reserves,

ness will be an important factor to the ultimate goal of all nationsworld peace," added Schmitze

Another interesting fact brought by Schmitz attempted to show the untruth of many of the reports about the racial question in Germany's preparation for the Olympics.

"The German team has not been selected yet. We are still holding elimination contests which will likely continue until the early part of next year. Not until the athletes paration for the games and during in cities and other centres are trained sufficiently will final climinations start. They are held in the same manner as the United States hold theirs. One Jewish athlete, Scheidt, is highly thought of as a prospect in the sprints. He will receive the same training as other athletes, but will have to be successful in the eliminations before he is selected."

Germany is making extensive preparations, he said, as all the nations intend to put the strongest and largest team possible in competition. Japan already has men in Germany studying the climatic conditions in the sector where the winter sports are to be held.

Schmitz reported that the sale of tickets was Bo great in Germany that it was necessary to suspend the sale in order to leave enough tickets for foreign spectators. - United

His nearest rivals were Mark Seymour, with whom he shared the lead at the end of the first round, both returning 69's, Henry Cotton and Auguste Boyer, with aggregates of 143, W. J. Branch, the Belgian Open Champion, and C. S. Donny, both on the 144 mark.

Cotton, who was followed by a large crowd, was partnered with L. Von Beckerath, of Germany, who has played over-here in the Boys' Championship. The ex-open champion had a misadventure at the fourteenth during his first round. In an attempt to play an explosion shot he hit the ball cleanly and it finished in a wood. went to defendant's shop on May 25 for the purpose of buying a car. A 1928 model Austin Seven was : produced and plaintiff agreed to purchase it at the price of \$280. Certain repairs had to be effected and defendant agreed to deliver the vehicle within three days. A sum of \$100, which formed the subject of the claim, was deposited. When the time arrived for the car to be delivered, the defendant failed to deliver it, and when plaintiff visited the garage he found that certain parts of the car had been changed. He demanded back his \$100, but defendant refused.

The case for the defence was denial that there had been an agreement to deliver the car within three days. None of the parts of the car had been changed, it was claimed, and the failure by plaintiff to take delivery of the car rendered liable to a breach of contract.
